Information and Communications

## Insert SIM card

Your service provider will supply a SIM card, containing all the key data about your line.

You may need to snap this out carefully from a credit card sized SIM

• Use a coin to unscrew the cover (1)

• Lift off the battery cover (2)

• Slide out the SIM carrier (3), then turn it in the direction indicated by the arrow (4).

• Slide the SIM card into the carrier (5). Ensure the angled corner is positioned correctly and that contact is made.

• Turn the SIM carrier until the SIM card faces the phone (6).

• Slide the SIM carrier into the phone until it clicks into place (7).

• Insert the battery into the phone and close the cover.

Charge battery

The new NiMH battery is not yet fully charged:

• Insert the charger plug into the socket on the phone (with arrow on plug facing upwards).

• Plug charging unit into a mains power socket (ensure voltage range stated on charger is not exceeded).

The unit is fully charged after 2 hours. The charging unit will heat up when used for longer periods.
if you experience a reduction in usage time, carry out the battery care function (p.52).

⟷▱ Display shows charge level.

Usage time
A fully charged battery: 50 - 180 hours standby time **or** 90 - 300 minutes talk time.

Batt. empty: ▱ - ▱ - ▱ full

A beep sounds when the battery is nearly empty.

Soft Keys

The current functions are shown on the display as symbols or text above the keys. Different functions are available by pressing either the left or the right end of the keys.
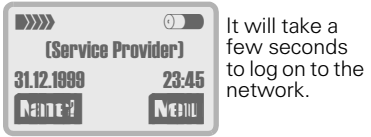

In standby, the soft keys enable fast "name" dialling and menu access or access to a special service, such as SIM service.
Switch on

Do you still have to insert the SIM or battery? See reverse page for details.

Switching PIN control on/off, change the PIN code, p. 54.

📵	Hold down to switch on or off.
⌨	Enter your PIN code. (correct any errors with C).
OK	Confirm (soft key).

It will take a few seconds to log on to the network.

When the name of the service provider appears, the phone is in standby.

If the signal is too weak, move to a window or open space.

By pressing the **SOS** soft key, you can make an emergency call on all networks even without a SIM card or PIN code.

Making a call

⌨	Enter the phone number (**always with prefix**).
📞	Press. The phone number on the display is dialled.
📵	Press. The call is ended.

| 📞 | Dials any highlighted number in messages. |

Redialling

The last 10 numbers you called are stored.

In standby:

📞	Press.
📞	Pressing again dials the last phone number used or
⬆⬇	scroll to highlight previously used numbers.

Auto redialling

AutoDial	Press to repeatedly dial a number in progressive intervals for 15 minutes.

Records

The last calls received, made and missed are stored (depending on network).

|	
Menu	Press, and select **Records** followed by the required list.
⬆⬇	Scroll in the list and select a phone number.
📞	Press for the last caller or choose a different caller from the list.

International dialling code

0 +	Press until "+" appears.
+List	Press and select country **or** enter dialling code.
⌨	Enter the national phone number (the first digit is omitted in many countries).

Making an entry in the Phonebook

⌨	Enter the required phone number **with** prefix.
📖	Press.
⌨	Enter a name for the number.

Text entry: Press the digit keys repeatedly until the required character appears.

The cursor moves on after a short pause.

C	Press briefly to delete the last character; hold down to delete the last word.
OK	Press. The phone number is stored and can be dialled immediately:
📞	Press.

Making a call

📖	Open phonebook.
⌨/⬇	Select a name with the first letter and/or scroll.
📞	Press, the highlighted entry is dialled.

Phonebook menu

Open the phonebook and highlight an entry. The functions available include among others:

Edit Entry, Delete Entry, Send as Text, Check Space and **VIP Entry** for important numbers.

Calling Symbols Add picture to phone number.

Fast Access keys

- Set the soft key:

Name?	Press (the first time, then Change) or, e.g.

- Set speed dialling number (2 - 9):

2ABC	Press digit key.
Set	Press

... then select a function from the list:

- Open the **Phonebook** to select a phone number (e.g. "Office").
- If you select an application (e.g. **Games**), this is assigned directly to the soft key.

Select	Press.

Making a call (e.g. the "Office" no.):

Press **Office** / **OK** or first press a speed dialling number, e.g. 2ABC.

Making several calls at once

(Depends on the network)

- If the "Call Waiting" feature is available in the network, you can answer a second call, put the first on hold and switch back and forth between the two calls.
- You can make a second call, then return to the first and join all calls together (conference). To do this, during the first call:

Hold	Press.
📖 / ⌨	Make the second call.

Press **Swap** or **Menu** and select **Conference**.

📵	Press to complete a call or return to the first call

Menu Control

Main Menu

The main menu is always reached from standby mode by pressing the right soft key.

Menu	Press.

Submenu

You can branch from the main menu into submenus for accessing functions and options:

Press **Menu**, **Select** or **Options**.

Go back

📵	Press briefly to go back one menu level.
📵	Hold down to go back to standby mode.

Features available in the main menu:

Usage Hints

A brief introduction to the various phone functions.

SIM Services (depending on SIM card)

Special applications, such as banking or stock market functions, if supported.

Internet 35i (depending on the network)

This area in the main menu can also be set with one of the other functions listed below.
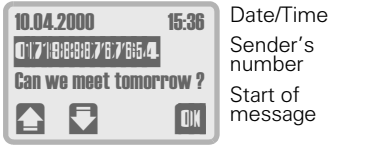

Office & Fun

- Internet 35i: Access to special sites on the World Wide Web.
- Appointments: Entry of daily or regularly recurring appointments.
- Calculator 35i: Basic calculator functions and memory.

- Currency Conv.: Conversion between 3 currency pairs.
- Games: Have fun!
- Chronometer with Stopwatch, Alarm Clock and Countdown.

Messages

See right for further information. Your service provider may offer Cell Broadcast where specific and local information is broadcast.

Records

The phone stores the most recent calls, whether made, received or missed, as well as appointments missed.

Audio

You can select a variety of volumes and melodies for acoustic signals. There are 21 melodies to choose from for the ringer and you can also compose your own melody.

Time/Charge

You can display call charges and duration.

Divert

Diversion of calls to your own mailbox or to other numbers

Setup

- Selection of a particular service provider and network services.
- Options for restricting the usage of the phone.
- Basic phone settings such as language, time, usage in car, etc.
- It is possible to communicate with PCs by integrated modem.

✉ Text Message

✉	Indicates a new message on the display.
read	Press to read.

10.04.2000   15:36
0171 888 76 76 54
Can we meet tomorrow ?

Date/Time
Sender's number
Start of message

read	Scroll through the message.

OK	Access message menu with further functions, such as reply, edit, delete, etc. (see p. 38).
📞	Press to select highlighted phone number.

Messages should **always** be deleted after they have been read.

☎☎ Voice Message

The service centre provides you with a mailbox that operates in the same way as an answerphone.

Listening to Voice Message

☎☎	Indicates a new voice mail on the display.

A voice mail can also be indicated by a text message (✉) or a call.

Call and listen to mailbox:

| 1☎	Press (see "Digit Key", page 18).

✉	Flashes when memory is full. Delete messages as otherwise no more messages can be received.

Writing and Sending Messages

Menu	Press, select **Messages**, then **Write Message**, then **Create New**.

⌨	Write your message (T9 editor, see p. 35).

1∞	Set a blank.
*	UPPER/lowercase.
0 +	Insert a full stop.
OK	Press and select **Send Text** from the menu.
⌨ / 📖	Enter the phone number/select the no. from phonebook.

If necessary, enter the phone number of the service centre retain type and validity (see p. 39).

Send	Press.

Setting Voice Message

If not already pre-set, you will receive a number for calling the mailbox and one for diverting to the mailbox.

❶ Calling the mailbox (playback)

Menu	Select **Messages** then **Voice Message**.
⌨ / OK	Enter the "Call" no. to hear the messages.

❷ Call diversion to mailbox

Menu	Select **Divert** then **All Unanswered** then **Set**.
⌨ / OK	Enter the diversion number to the mailbox.
